Day 3: Bushmen encounter

We dedicate this day to visit the Bushmen community and get to know more about their ancient traditional and cultural activities. We start a day with a bushwalk; we learn more of Bushmen hunting techniques e.g. tracking, stalking and finding small game such as hare and reptiles. The women will teach us about many edible plants, where to look for them and how they are used for e.g. contraceptives. The medicine man will introduce us to traditional healing plants and rituals.

We will round off the day with a village visit, dancing and singing before we say goodbye to our Bushmen friends.
